- **Frameworks and Libraries:** React.js, Next.js, Angular, Tailwind CSS, Material UI, shadcn/ui, Bootstrap

- **Tools and Technologies:** Git, GitHub, GitLab, Chrome DevTools, REST APIs, Postman, SonarQube, Google Lighthouse, Jira, Figma, Webpack

EXPERIENCE

- **Synechron Technologies Pvt. Ltd.**
  Senior Associate – Technology → Lead – Technology — March 2021 – Present
  - Promoted to Lead – Technology in March 2025 in recognition of technical leadership, ownership, and consistent delivery of high-impact frontend solutions.
  - Leading the migration of Synechron's website to Next.js, significantly improving performance, scalability, and SEO by leveraging hybrid rendering (SSR/SSG), route-level code splitting, bundle optimization, and Core Web Vitals enhancements.
  - Collaborated with cross-functional teams (Design, Backend, DevOps) to modernize frontend architecture, streamline CI/CD deployment workflows, and ensure production-grade reliability.
  - Spearheaded performance optimization initiatives, improving user experience and overall site functionality, resulting in measurable engagement and performance gains.
  - Developed responsive, accessible UI components and integrated web services to enhance usability and maintain design consistency across devices.

- **Infogain**
  Software Engineer — May 2019 - Feb 2021
  - As a Software Engineer, I focused on crafting responsive web designs and seamlessly integrating web services, refining functionality, and enriching user experiences. Notably, I contributed to the healthcare project, Infomedika.

- **Boston Byte LLC**
  Frontend Developer — Jan 2018 - May 2019
  - As a Frontend Developer, I specialized in crafting responsive web designs and seamlessly integrating web services to optimize functionality and enhance user experience. Notably, I contributed to the healthcare project Wello.

- **VCreatek Consulting Services Pvt. Ltd.**
  Software Engineer — April 2017 - Jan 2018
  - At Vcreatek, I proficiently developed responsive web designs, seamlessly integrated web services, and crafted visually appealing websites using WordPress and Bootstrap. Additionally, I served as the lead front-end developer on two products: Rogers and Foshan.

- **Hmmbiz Web Solutions**
  Frontend Developer — Aug 2016 - Apr 2017
  - At Hmmbiz Web Solutions, I worked in crafting responsive web designs and implementing effective Search Engine Optimization Strategies, to optimize user experiences and drive online traffic.

PROJECTS

- **Chrome Extensions :** Created two fun Chrome extension
  1) Social media blocker - Once activated, this extension restricts social media usage and provides warnings each time you attempt to access these sites, boosting productivity. [Link](#)
  2) Drink Water - Once activated, it will remind you to drink water every 20 min with the message. [Link](#)

- **Bluesky Post Sentiment Analyzer :** Bluesky Post Sentiment Analyzer which scores posts based on positivity, negativity, and overall tone using an LLM on Hugging Face! It's a quick way to get insights into the vibe of any post on bluesky. [Link](#)

- **Bluesky Pass Generator :** Create a personalized Bluesky Social Profile Pass! Enter your Bluesky Social ID to generate a comprehensive pass featuring all your profile details. Easily download, share, and showcase your custom pass with a QR code. [Link](#)

- **Diwali Wish generator:** Diwali Wish Generator enables users to create and share Diwali wishes. [Link](#)

CERTIFICATES

- **Microsoft Certified :** Received the Microsoft Azure Fundamentals certification (AZ-900) demonstrating foundational-level knowledge of azure. [Link](#)

- **FreeCodeCamp Certified :** Received certification from FreeCodeCamp for expertise in responsive web design, demonstrating proficiency in creating adaptable and user-friendly interfaces. [Link](#)
